

Billionaires For Bush say:
**Brokerize
Social Security!**

Billionaires For Bush stand ready to help President Bush take money from the under-burdened people of Main Street and give it to the under-funded folks on Wall Street.

Take From Main Street And Give To Wall Street!

If we win, ordinary Americans will pay \$4,900,000,000,000 to finance just 20 years of Bush's plan. But that's just the start: when we get our hands on your retirement money, we'll throw in brokerage fees, deposit fees, management fees, service fees, early withdrawal fees and other fees so new that we haven't even invented them yet!

The Painful Truth About Social Security:

- \$ It's the government's most popular program.
- \$ It's running a huge surplus.
- \$ It disbursed \$492 billion to retirees, their survivors, the disabled and orphans in 2004 — 47 million people in all. And very few were CEOs!
- \$ It delivers money straight to those who have paid into the fund, leaving brokerage houses completely out of the loop.

This is a crisis... *for Wall Street!*

For 70 long years, we could only dream of exploiting retired Americans. Finally, our dream is within reach. Please, help us weaken—and then destroy—Social Security. It ain't broke, so we'll make it broke!
